

YOUNG_general description of the model_NEW

DESIGN BY ROSSI&CO

Young is a new kitchen that Stosa is launching to coincide with Salone del Mobile 2022. The model offers the perfect solution for young, smart and fashion-conscious customers in search of minimalist design, original colour combinations and a touch of urban style.

Young features simple, linear shapes along with some of the brand-new design elements that Stosa Cucine is launching at Salone del Mobile, like the door with Step handle, wall unit with curved door, and open connecting module.

As with the other Stosa Cucine kitchens on show, Young can be mixed with other models to create infinite design opportunities. **What sets this model apart is its ability to look modern and fresh at all times**, thanks to a range of colours and finishes. Original combinations can be selected to match the tastes of users determined to make their own fashion choices.

Finishes include woods, stone effects and single colours. The new curved wall units can also be included in Young compositions.

Doors can be either squared or Step – a design with an integrated grip handle that simulates the groove system and offers quick, easy opening and user-friendly functionality.
