

INFINITY_general description of the model

DESIGN BY ROSSI&CO

Attention to detail and minimalist design transform every Infinity kitchen into a unique creation.

The **versatile Infinity range** is the perfect choice for a dynamic and creative kitchen in which everything is possible.

This unmistakable collection spans Nordic-inspired designs, metropolitan compositions and finishes from **typical wood grain to high-tech materials like Fenix and ecological alternatives like PET**. Infinity lets you **customise your kitchen** to match your stylistic preferences and functional needs.

Alternation between light and dark, the juxtaposition of colour and wood, plays on volume and the striking contrast between open and closed space: Infinity stands out for its attention to detail and fully integrated high-tech functions and makes your kitchen truly "yours".

The **Diagonal handle** is named after its unique, diagonal grooved grip. **Innovative design and carefully selected materials and finishes** transform Infinity doors into **distinctive features** that add character to your kitchen and style to space.

The key feature of Infinity can be deduced from the name: this model offers infinite possibilities to create whatever kitchen composition you want.
