

NATURAL_general description of the model

DESIGN BY ROSSI&CO

Natural was the first Stosa model conceived using **Evolution System**, the design system that extends kitchen, revolutionises modularity, renews interior accessories and structural details and offers even more elegant design.

Natural is characterised by doors in smooth or beadboard Oak that express the true **authenticity of wood**.

Two new finishes have been added to the range for Salone del Mobile 2022: Rovere Termocotto with a smooth or ribbed surface, and Noce Elegant, also smooth or ribbed.

Natural combines the fascination of natural wood with impressive modularity achieved by continuous research and development. **Taller and deeper kitchen elements offer more storage capacity than ever before.**

The collection also includes **living zone solutions** for a coordinated lounge and kitchen.

By combining different elements and finishes, Natural creates a dynamic environment capable of integrating kitchen and living areas in the one room. Thanks to open space layout, flowing passages and perfect continuity of style, the two areas blend seamlessly into one.

This kitchen comes with flat groove opening systems with pocket, diagonal handles, L-shaped handles, **or recessed grooves**, either simple or with L-shaped handles.
