

08 Newport Metropolis home office **Evolution System- Classic Glam**

In response to the rapid increase in smart working and changes in the way we live and work, **Stosa is offering a Metropolis solution in which functionalities and modular designs combine to form a practical and convenient work station. The Fenix® finish of the drawers and wall units ensures practicality and strength while the Rovere Arena splashback with Joy System elements provides ample space for documents, books and accessories.**

The refined tones of **Grigio Bromo Fenix®** are accompanied by the warmth of **Rovere Avena**, a finish inherited from the Newport model and another demonstration of the amazing mixability of the Stosa range.

The composition is installed in a single block with hidden retracting doors that make the work area look like a cupboard when closed, allowing it to be included in either the lounge or the kitchen.
