

COLOR TREND_general description of the model

DESIGN BY ROSSI&CO

Linearity and geometric shapes are the key stylistic features of the Color Trend project: clear-cut outlines and materials come to the fore, with natural light playing a leading role in the composition.

Color Trend kitchens can be based on the Look System or the Evolution System.

Color Trend is a modern kitchen that fully satisfies today's need for **quality, style and performance**. The base cabinets and wall units are perfect for creating minimalist kitchens without compromising on functionality and attention to detail.

The smooth doors are available in 47 colours, including matte and gloss lacquer variants as well as 3 new lacquer finishes: Metal Lux, Bronze Lux and Magnolia Lux. This extensive palette allows neutral and bright colours to be mixed within the same model, and means that Color Trend modules can be combined easily with other models of kitchen.

Simple, smooth doors give this kitchen **unrivalled versatility as well as mixability with all other Stosa kitchen models.**

Color Trend modules can be included in both classic and modern kitchens, and represent **the perfect way to create original and completely personal compositions.**

Combinations of **Color Trend with Natural** are great examples of this, with doors and inserts featuring the natural look of wood – the ultimate noble material – and with the Color Trend elements stylishly balanced in an elegant and distinctive blend of colours and textures.

On their own, **Color Trend modules create kitchens in which colour is the most important feature.** Matching or contrasting pastel shades paired with bright lacquers permit striking and original combinations characterised by contrast, chiaroscuro effects and variations in hue.

The **opening systems** are specially designed not to spoil the lines of the furniture. On the contrary, they serve as a design element that underscores the compactness of the volumes. **Color Trend offers a choice of handles including an essential model and an L-shaped grip** of refined simplicity. **The model also comes with flat or recessed grooves,** or the new 40° sloping handles.

The **Color Trend** range also includes **interesting living zone solutions** for coordinated open spaces in which different areas share a unified style.
