

03_Metropolis Maxi-Capacity Evolution System

This linear composition features 75 cm wide modules and the new finishes introduced for the model's last restyling.

The maxi tall units have doors in the new Acciaio Metal PET finish and black Brooklyn handles. Combined with the taller wall units with push-pull opening, they create an attractive surround for the work niche with Mars Planet Collection quartz worktop by Quartzforms®.

The wall units are installed at two levels to increase capacity, exploit vertical space and vary the volumes by means of different depths and new finishes. The base cabinets and wall units of the niche are in **Rovere Cornero Riga** and are **contrasted by a full-height splashback in matte Nero glass.**
