

STOSA CUCINE CELEBRATES 60 YEARS OF EXCELLENCE IN ITALIAN DESIGN

Stosa Cucine, a leader in quality Italian kitchens, is proud to celebrate an extraordinary milestone: **60 years of history, innovation, quality and commitment to sustainability.**

Since it was **founded in 1964** in a small Tuscan workshop in **Piancastagnaio**, Stosa Cucine has become an **ambassador of Italian design and taste**, symbolising a path that combines **tradition and avant-garde**, becoming an **internationally recognised brand** for its innovative style and uncompromising quality.

During these six decades, Stosa has followed a path of steady growth, expanding beyond national borders and becoming a benchmark in the kitchen sector. Since 1985, under the skilful leadership of the Sani family, the company has flourished and consolidated to become a benchmark brand in the industry.

Stosa Kitchens has woven a story of growth and ambition. The new factory acquired in 1990, the transformation into a **Limited Liability Company in 2000** and the international expansion are living pages in a story that culminates in the celebration of a futuristic vision in the majestic new **headquarters in 2008.**

A pioneer in the field of **sustainability**, Stosa Cucine has made history by being the first Italian company in the sector to publish a **Sustainability Report** in accordance with the prestigious **GRI Standards methodology**, the most widely recognised in the world for **reporting on ESG (Environmental, Social and Governance) impacts**: a march into the future, reinforced by investment in environmentally sustainable solutions and a relentless commitment to reducing environmental impact.

The sustainability report has earned the company a prestigious record: Stosa Kitchens was the first in its sector to publish such a document.

Over the years, the company has distinguished itself by implementing strategies to improve environmental sustainability by investing in photovoltaic systems, reducing CO2 emissions, selecting environmentally friendly and traceable materials, and using raw materials from certified and responsibly managed forests, thanks also to its **12-year partnership with FSC®.**

Quality and Italian character, two pillars of the brand, are guaranteed by prestigious certifications such as **ISO 9001:2015** and the **100% Made in Italy** brand. Stosa also stands out in 'circular manufacturing' thanks to its **COSMOB Qualità Praemium (CQP)** certification, an expression of the

company's holistic and sustainable approach and concrete proof of the sustainable approach Stosa takes at every stage of production, from design to material selection and final production.

One of the most significant and important projects that the Sani family is passionately pursuing is the construction of the bold and innovative **Stosa Green Park**, a **150,000 square metre advanced industrial complex** for manufacturing and business growth that will bring employment benefits to the area and redevelopment of the surrounding area. This initiative underlines the company's desire to grow and create a working and production environment that respects the highest ecological standards and actively contributes to the preservation of the environment.

Stosa Cucine's achievements continue to multiply: The company has received prestigious awards in the Champions of Growth 2024 and Future Respect 2023 Index, recognitions of its flourishing prosperity and commitment to conscious innovation. These awards add to the company's already impressive collection of accolades, including being named Champions of Service for the year 2022-2023..

Stosa Cucine's ambitious retail expansion strategy has seen the company consolidate its presence with 600 outlets nationwide and significant expansion in more than 80 countries worldwide. This expansion demonstrates Stosa's extensive global reach and underlines the recognised expertise that has made the company a benchmark in the industry.

At this celebratory moment, Stosa Cucine renews its commitment to pursue a future of excellence and social responsibility. Looking to the future with confidence and determination, the company is committed to maintaining its status as a leader in the designer kitchen sector and actively contributing to building a more sustainable and conscious world.

Stosa Cucine is not just a brand, it is an experience that comes through technology, innovation and service. An all-Italian success story to celebrate and an opportunity to renew the commitment to a path of continuous improvement and social responsibility.
