

ALIANTE_general model description

DESIGN BY ROSSI&CO

Aliante, which is positioned at the top of the Stosa Cucine range, is designed to meet the requirements of the most refined customer, embodying the perfect combination of design and practicality. This distinctly modular kitchen was conceived using the Evolution System, and features increased space in the base units, drawers, tall units and cabinets, with the addition of double shelves in the base units and deeper worktops, for maximum organisation and ease of use of the accessories. Each detail of the interior is finished to the highest standard, including the 8 cm plinth and the grooves, available in Nero brushed or Titanio finishes; these enhance the volumes of the kitchen and lend it a strict geometrical appeal, further emphasised by the clean, essential shapes.

Aliante's compact elegance is highlighted by an extensive selection of high-end materials and finishes, including glass. This material not only lends colour depth and a sense of lightness to living spaces, but also adds a touch of class to any environment.

Available in glossy and matt variants, the reflective effects of glass inspire experimentation, and this material boasts the enduring quality of being hard-wearing over time, as well as hygienic and easy to maintain. The range of finishes also includes HPL (High Pressure Laminate), available in a wide range of textured, stylish colours, and finally, Neolith®, a non-porous sintered stone brimming with character, which marries durability and style and is available for front panels and work surfaces.
