

INFINITY_GENERAL MODEL DESCRIPTION

DESIGN BY ROSSI&CO

Unwavering attention to detail and a minimalist approach to design elevate each composition to exclusivity. Indeed, the Infinity model is a versatile kitchen that transforms any space into a vibrant, creative environment, providing endless possibilities for customisation.

Characterised by a unique style that spans Scandinavian inspiration and compositions with a metropolitan feel, Infinity offers an extensive range of combinations and finishes: from natural wood grains to cutting-edge materials such as Fenix, as well as environmentally-friendly options such as PET. All solutions are fully customisable, to meet every aesthetic and practical requirement.

The design of Infinity is distinguished by the expert balance between light and shadow, a harmonious fusion of colours and materials and an innovative approach to the organisation of spaces, playing with volumes and alternating solid and empty areas. This focus on detail is combined with the integration of avant-garde technologies, creating a kitchen with a distinctive spirit and a strong personality. The door, with its refined design and exclusive selection of finishes and materials, is transformed into a central element that enhances the room, helping to establish a clear sense of identity. The essence of Infinity is embodied in its name: it invites an exploration of a vast range of possibilities, enabling customers to create the kitchen of their dreams.
